

A ACCESSORIES

B.E.A.S.T. Edging

- Easy to use
- Uses easy-to-find spiral nails for installation
- Withstands a wide temperature variance
- Designed to allow lattice nailing pattern for strength & stability
- Allows natural vegetation growth
- Backed up by a company with experience and staying power

Nineteen years' experience and millions of feet of paver installations have gone into the development of B.E.A.S.T., our premium paver edging. Super strength, super flexibility, amazing straight lines, perfect curves. Pavers never looked so good! Pieces are 8 feet long x 1.75 inches high, 3 inches deep x 2.5 inches wide.

The same flexible piece guides both straight lines and curves. Superior design delivers a perfect, long-lasting finished edge.

Fabric & GeoGrid

Rinox carries a full line of fabric and GeoGrid for all your landscaping and construction needs. They are most commonly utilized with retaining walls, steepened slopes, paver underlayment and base stabilization. As a premier designer and supplier of tall wall structures in the Northeast, we can provide solutions for the most complex projects with on-site assistance, construction details and engineering.

Paver Lights

Rinox offers a variety of paver lights to fit many of our paving stone lines. They are designed with extra ribbing and thicker, more durable lenses to withstand high traffic, as well as outside elements. Lights are available in 4" x 8", 6" x 6" and 6" x 9", and include a 7-watt bulb, receptacle and two quick-connectors. Our 12-volt system is safe and economical. Bulbs are easy for adults to change but are not accessible to children. Kits come with complete, easy-to-follow installation instructions.
