

# EDGESTONE

BORDER

EDGESTONE  
*Ash Charcoal*

The Edgestone Border stone provides for a beautifully textured and antiqued edging treatment; face sizing makes curves and turns a breeze. When used in conjunction with our pavers, Edgestone will provide the added finishing touch to your project. Edgestone is textured on the top and front, allowing for a more natural Belgian Block look without the cost normally associated with natural stone. Edgestone may be used to border flower beds, trees, walkways and driveways.
