

P-QUATTRO

PERMEABLE PALAZZO
PAVER PATTERN

P-QUATTRO
Milton Gray

How P-Quattro Works

P-Quattro stones fit together to form beautiful “woven” patterns while leaving open areas for water to soak through. Check out the time-lapse photos below. The water from the hose running full blast won’t puddle or pool on the P-Quattro pavers.

Hose running 30 seconds

Hose running 2 minutes

Hose running 5 minutes

Our P-Quattro permeable pavement system provides great aesthetics without sacrificing drainage performance. The unique “lattice” design and color blends will provide a beautiful, long-lasting pavement while providing design flexibility for your projects. P-Quattro utilizes a tight, spacer-less design.
