PERMEABLE PAVEMENT

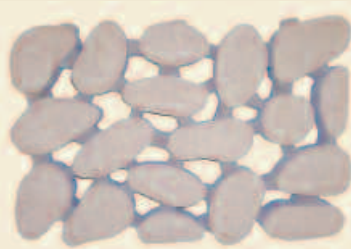

TERRASTONES  
Natural

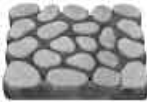

TERRASTONES  
Natural

TerraStones are aesthetically pleasing and maintain the same environmental standards of other erosion-controlling pavers. Unique to the marketplace, they have smooth, rounded shapes with the appearance of river rock or cobblestone. These permeable pavers are best suited for driveways, boat ramps, overflow parking lots or emergency fire lanes.

*All stones are connected by a webbing system for easy installation. The spaces can be filled with a permeable substance so that the webbing is concealed and water passes right through.*
