

TURFSTONE

PERMEABLE PAVEMENT

TURFSTONE
Natural

Rinox has developed TurfStone – a special paver line to respond to the ecological concern of rainwater flow. The unique design of this paver allows rainwater to be filtered back into the earth naturally. The voids in the pavers allow for vegetation growth to provide both an aesthetic and an erosion-control benefit.

Colors: *Natural, Buff*

Custom colors available upon request; minimum order applies.
