

## Pave Your Way to a NEW LANDSCAPE DESIGN

Instead of a muddy backyard or cracked and chipped concrete, you can transform your outdoor living space into an attractive and enjoyable environment. Rinox is a leading manufacturer in pavers, retaining wall materials, and masonry, all an exceptional alternative to traditional concrete or asphalt.

Rinox pavers have the look of natural stone at a more affordable price, and a variety of sizes, shapes, and colors to provide a greater flexibility in a landscape design. With the right choice in colors, designs and materials, the end result is a look that is both prestigious and beautiful. Walkways, driveways, patios and pool decks can all be transformed into something creative and unique to the homeowner. Rinox offers a modular paving stone system made up of four different sizes to add character, giving the appearance of randomly placed stones. These attractive stones dramatically improve a home's exterior charm and curb appeal.

Interlocking concrete pavers are flexible, designed to move with the soil beneath, preventing the unsightly cracks associated with traditional concrete. Should you need access to the surface below, pavers can easily be removed while the work is done and replaced upon completion. Proper application requires layers of crushed stone, sand, and separation fabric, making it nearly impossible for the up-growth of annoying weeds between the stones. Best of all, a Rinox patio or garden path requires little to no maintenance, freeing up precious weekend hours for family or friends.

Unlike traditional concrete, Rinox pavers and walls are highly resistant to cracking as well as damage from

freeze-thaw cycles and salts that occur in the winter months. This resilience is due to the high density of the pavers, as well as their small size. The Rinox warranty proves the manufacturer's confidence in the pavers' durability. Rinox offers a lifetime warranty for the structural integrity of their concrete products when installed in compliance with their installation instructions and industry standards.

Knowing the pavers will maintain their beauty and durability for years to come is a priceless part of the investment. The durability of the stone comes in part, from the "interlocking" feature of the product, and the quality of the finished product is highly dependant on the construction of the base. Therefore it's important to enlist the services of an experienced hardscape professional or authorized Rinox dealer.

When it comes to professional landscaping, Stonehenge Materials offers convenient, one-stop shopping in the Delaware Valley. They offer an extensive inventory of hardscape and landscape supplies for every outdoor project and are an authorized Rinox dealer. Stonehenge Materials is located just 15 miles west of Philadelphia in East Norriton, PA.
